# 1. Introduction

MP W7100SP and MP W8140SP are versatile and productive wide format multifunctional printers (MFPs). Designed to meet mid- to high-volume requirements in the technical wide format market (architecture, engineering, construction, manufacturing etc), they combine high quality black-and-white printing and copying with colour scanning. MP W7100SP will produce 10 A1 prints a minute and MP W8140SP will produce 14 A1 prints a minute.

The new MFPs provide a single compact solution to all wide format imaging requirements. Connected to the print network, they allow workgroup users to print complex technical drawings at speed, make accurately scaled copies of hand-drawn originals and blueprints, and scan colour documents in high resolution for onward distribution and electronic storage.

Ricoh's next generation controller architecture (GWNX controller) simplifies operation and streamlines the document workflow. The 9 inch colour touchscreen panel and intuitive operation system will be familiar to users of Ricoh's small format MFPs. The integrated web printing tool - a browser-based print utility - supports HP-GL2, HP-RTL, TIFF, CALS, JPEG and PDF file formats.

Mark-ups and amendments are an everyday fact of life for architects, engineers and contractors. The integrated colour scanner with its simple scan-to functionality allows users to record and communicate critical changes with unparalleled ease. Large format documents can be scanned in colour to email, USB/SD memory, the integral document server or to a network location.

Despite their versatility, MP W7100SP and MP W8140SP are amongst the most compact wide format systems available. The colour scanning station and the print engine are integrated in a single console, eliminating the need for separate stand-alone units. Front-facing operation reduces spatial requirements and, with a footprint of just 1,250mm by 755mm, the new MFPs take up less than 1m<sup>2</sup> of floor space.

MP W8140SP can also be deployed in applications where there is a requirement for separate scan and print stations. The optional Scanner Separation Unit (MP W8140SP only) allows the colour scanning station to be detached and mounted separately from the print engine. This option will prove useful in applications where the sheer volume of scanning might otherwise restrict access to print output.

MP W7100SP and MP W8140SP are designed for intensive use. Prints and copies are delivered at speed and the durable system can be used to produce up to 16.620 metres of print a month. To support productive operation, the standard two-roll paper feed system can be expanded to four rolls with the addition of an optional two-roll paper feed unit or a two-draw cassette for pre-cut media.

A range of optional paper handling systems enable MP W7100SP and MP W8140SP to be configured to individual customer requirements. They include an original hanger, a single-station multi-stacker, a dual-station multi-stacker and an original tray. RFG - a third-party supplier - also offers an online folding system for MP W7100SP and MP W8140SP that will automatically fan and cross fold documents.

The launch coincides with a nascent recovery in manufacturing and construction. Ricoh's productive wide format technology can be used to streamline design processes, reducing time to market. And, because it is so affordable, the technology will support the needs of customers looking to move from restrictive centralised print solutions to more accessible workgroup solutions.

This guide explores the functionality of the products in more detail, explaining new features and identifying key selling points. It includes side-by-side comparisons with competitor products.

## 2. Quick Overview

MP W7100SP and MP W8140SP are wide format multifunctional printers (MFPs). They print and copy in black and white and scan in full colour. Network ready, they can meet the wide format imaging needs of medium- to large-sized technical workgroups. The integrated web printing tool supports HP-GL2, HP-RTL, TIFF, CALS, JPEG and PDF file formats. Documents can be scanned in colour to email, USB/SD memory, the integral document server or to a network location. MP W7100SP produces 10 A1 prints a minute and MP W8140SP, 14 A1 prints a minute. The compact single-console design saves space and the colour touchscreen operational panel simplifies use.

### The main specifications are:

- Wide format multifunctional printers
- Compact single-console design
- 1,250mm x 755mm footprint (less than 1m<sup>2</sup>)
- Black and white printing and copying
- Colour scanning to email, USB/SD card memory, document server or network location
- Ricoh next generation (GWNX) controller architecture
- 9 inch colour touchscreen operation panel
- 320GB HDD providing document server functionality
- USB/SD card reader located on the control panel
- Network ready with Gigabit Ethernet interface
- Integrated web printing tool
- Two-roll paper feed (option to expand to four rolls)
- Cut sheet bypass (single sheet)
- Fully synchronised cutter
- 10 A1 ppm (MP W7100SP) / 14 A1 ppm (MP W8140SP)
- 600 dpi print/copy/scan resolution
- 25% to 400% zoom with 0.1% increments
- 15m / 30m maximum print length

### Feed and finishing options include:

- Third-/fourth-roll feed unit, or  
Two-draw cassette for pre-cut media
- Original hanger
- Original tray
- Single-station multi-stacker, or  
Dual-station multi-stacker, or  
RFG (third-party) online folding system
- Spare paper roll holder
- Scanner separation unit
- Wireless LAN interface
- Web browser unit
- OCR unit
- SD card for NetWare printing
- DWG printing

A full list of options, order codes and configuration dependencies is provided in section 6. Configuration and Ordering.

**MP W8140SP and optional Scanner Separation Unit**

Quick Overview - Main Specifications			
		MP W7100SP	MP W8140SP
Functionality		Print (B&W), copy (B&W) and scan (Colour)	
Configuration		Console includes scanner, print engine, bypass and two-roll paper feed (option to expand to four-roll paper feed)	
Paper feed (standard)		Two roll (175mm diameter, 210mm - 914mm width, up to 15m length) plus single sheet bypass	Two roll (175mm diameter, 210mm - 914mm width, up to 30m length) plus single sheet bypass
Paper feed (option)		Third and fourth roll (same specifications as above) or 2 x 250 sheet paper cassette	
Cutter		Fully synchronised cutter (preset / synchronised / variable cut)	
Print / copy speed		120 mm/sec (10 A1 ppm / 5 A0 ppm)	170 mm/sec (14 A1 ppm / 7 A0 ppm)
Maximum print size		914.4mm x 15m	914.4mm x 30m
Print languages (standard)		HP-GL2, HP-RTL, TIFF, WMF, BMP, CALS, PCX, JPEG, PDF, Calcomp, XLS, DOC/DOCX, PPT (standard) / DWG, DXF, DWF (optional)	
Scanning speed		42.5 - 340 mm/second	
Maximum scan size		914.4mm (36Ó) x 15m	914.4mm (36Ó) x 30m
Copy modes		Text, drawing, text/photo, photo, ruled line elimination, patched original, generation original, highlighter pen	
Enlargement / reduction		25% to 400% in 0.1% increments	
Memory		2GB RAM (copy/print), 2GB RAM (scanner) and 320GB HDD	
Interfaces		Gigabit Ethernet, USB host, USB 2.0, USB/SD card slot (standard) / Wireless LAN (option)	
Dimensions		1,250 x 755 x 1,200mm (W x D x H)	
Weight		230kg	
Print Volume	APV	1,200 linear metres or 2,020 A1 prints	2,500 linear metres or 4,210 A1 prints
	MPV	6,500 linear metres or 10,940 A1 prints	16,660 linear metres or 28,040 A1 prints
Maintenance	PM cycle	10,000 linear metres or 16,840 A1 prints	
	MCBC	3,400 linear metres or 5,730 A1 prints	
Machine life		1,683,000 A1 prints or 5 years, whichever comes first	

## 3. Sales Highlights

### Print, Copy and Scan

Network ready 3-in-1 MFPs, MP W7100SP and MP W8140SP can meet the imaging requirements of medium to large technical workgroups. Hardcopy originals are easily digitised and can be forwarded to email and saved in full colour. Multiple scaled copies can be produced from a single scan and, using the web printing tool, immaculately rendered black-and-white plots can be produced directly from CAD.

- Networked 3-in-1 wide format multifunctional printers (MFPs)
- Scan in full colour to email, USB/SD memory card, document server or network location
- Produce multiple scaled copies from memory (scan once, copy many)
- Drag and drop documents to the queue, set attributes and print remotely
- Enhance security and simplify workflow by releasing print upon collection

### Increase Productivity

MP W7100SP and MP W8140SP enhance productivity by producing immaculate print and copy output at speed. The wide format MFPs warm up in less than two minutes and will produce a first A1 print in less than nine seconds. MP W7100SP produces 10 A1 prints a minute and MP W8140SP, 14 A1 prints a minute. Equipped with 4 paper rolls (2 standard and 2 optional), there is no delay when switching from one media size to another.

- Warmed up and ready to print in less than two minutes
- First A1 print produced in less than nine seconds
- 10 A1 / 5 A0 ppm (MP W7100SP) or 14 A1 / 7 A0 ppm (MP W8140SP)
- Fully synchronised automatic cutter
- Two or four roll paper capacity reduces manual intervention

### Save Space

The productive 3-in-1 MFPs have a compact ergonomic design and will save valuable office space. The scanner, print engine and paper feed are integrated in a single console, eliminating the need for separate stand-alone units. Front-facing operation reduces spatial requirements and, with a footprint of just 1,250mm by 755mm, the new MFPs take up less than 1m<sup>2</sup> of floor space.

- Networked 3-in-1 MFP replaces multiple stand-alone systems
- Single console design encompasses scanner and print engine
- Tiny footprint (less than 1m<sup>2</sup>) saves valuable office space
- Simple front access to original feed station, operation panel and media
- Scanner can be mounted separately if required (option for MP W8140SP)

## Simplify Operation

Advanced features, such as document preview, password protection and lock print, help to streamline document workflows and protect document security. The 9 inch colour touchscreen panel with its intuitive menu system will be familiar to users of Ricoh's small format MFPs and, in centralised print environments, the USB/SD card reader facilitates simple walk-up use of the wide format multifunctional technology.

- Next generation (GWNX) controller architecture
- 9 inch colour touchscreen operation panel
- Digitise and distribute documents electronically
- Store and print documents on demand from the integral document server
- Encrypt, password protect and lock documents

## Manage Work

Operators can browse folders, check the contents of files, change print queue and hold, release or delete jobs stored within the document server using the touchscreen operation panel or Ricoh's remote Web Image Monitor utility. Using the same utility, remote users can check that the MFP is online and that the right media is loaded, before they send a job to print.

- Integral 320 GB HDD provides document server functionality
- Browse folders, preview scanned images and print documents on demand
- Manage print queues and hold, release or delete stored jobs
- Simple remote management via Web Image Monitor
- Lock print and release it securely upon collection

## Print from CAD

The embedded GWNX controller saves space, reduces expenditure and simplifies print processes. RP-GL/2, RTIFF and PDF drivers support printing of HP-GL/GL2, HP-RTL, TIFF, CALS, JPEG and PDF file formats whilst the DWG print option enables documents to be printed directly from AutoCAD. Using the intuitive web printing utility, remote users can also drag and drop documents to the print queue and set print attributes.

- Embedded GWNX controller saves space and reduces expenditure
- Includes high-bandwidth Gigabit Ethernet interface
- RP-GL/2, RTIFF and PDF drivers support HP-GL/GL2, HP-RTL, TIFF, JPEG and PDF formats
- DWG print option extends support to DWG, DXF and DWF format
- Web print utility provides simple remote drag-and-drop print facility

## 4. Product Positioning

- Wide format multifunctional printers (MFPs)
- Black and white printer-copier and colour scanner
- High speed throughput and high volume capacity
- 10 or 14 A1 ppm throughput, two- or four-roll media station
- Shared workgroup solution for technical markets
- Centralised solution for CRD and PFP

MP W7100SP and MP W8140SP are versatile and productive wide format 3-in-1 multifunctional printers (MFPs). They produce high quality black-and-white prints and copies at speed, and provide the facility to digitise hardcopy originals in full colour. The network ready wide format MFPs offer the speed and capacity to meet demanding mid- to high-volume imaging requirements in the technical market.

With a powerful embedded print controller providing support for multiple file formats, an integrated USB/SD card reader simplifying walk up use and the capacity to switch quickly between media sources, they are also well suited for use in centralised print environments, such as CRDs and Pay-for-Print bureaus, where a variety of documents need to be printed with minimal fuss.

## 5. Comparison with Predecessor

MP W7100SP and MP W8140SP are replacements for the successful MP W5100 and MP W7140. Developments of the same durable print engine, MP W7100SP and MP W8140SP feature a number of enhancements. The new MFPs incorporate Ricoh's next generation (GWNX) controller architecture, feature a new easy to navigate 9 inch colour touchscreen operation panel and include black-and-white printing and colour scanning as standard features.

Enhancements are listed below:

### New features include:

- Embedded next generation (GWNX) controller
- High-bandwidth Gigabit Ethernet interface
- 9 inch super VGA colour touchscreen operation panel
- Print functionality provided as a standard feature
- RP-GL/2, RTIFF and PDF drivers support HP-GL/GL2, HP-RTL, TIFF, JPEG and PDF formats
- DWG print option extends support to DWG, DXF and DWF format
- Colour scanning functionality provided as a standard feature

- Option to detach and mount the scanner away from the print engine (MP W8140SP only)
- Print from and scan to USB/SD card memory
- Preview scanned documents on the touchscreen panel
- Save scanned documents as searchable PDFs (requires OCR option)
- Animated jam clearance
- Superior print quality with reduced background noise
- Improved consistency on long print runs
- Synchronised cut using Web Print Tool, printer driver and PrintCopy Tool
- Improved trail edge print capability eliminates need to manually adjust margins
- Force print feature enables non-stop operation in the event of paper mismatch
- Preview, reprint and batch printing functions are supported by PrintCopy tool
- Complies with latest EPEAT Gold and Energy Star environmental standards

Features and advantages are described in section 8. Key Features

## 6. Configuration and Order Codes

### Hardware Configuration

MP W7100SP and MP W8140SP are supplied as floor-standing single-console multifunctional printers (MFPs) and incorporate a colour scanner, black-and-white print engine, single sheet bypass feed and two-roll media feed station.

- 1 = 50 sheet original output tray
- 2 = 9 inch colour VGA touchscreen operation panel
- 3 = USB/SD card reader
- 4 = Colour scanning station
- 5 = Front copy exit tray
- 6 = Single sheet bypass feed
- 7 = Two-roll media feed station

MP W8140SP configured with optional third-/fourth-roll paper feed

### Peripheral Options

- 1 = Scanner Separation Kit (MP W8140SP only)
- 2 = Roll Unit RU6540 (third-/fourth-roll feed), or
- 3 = Paper Cassette CT6510 (two-draw cassette)
- 4 = Roll Holder Unit [not pictured]
- 5 = Original Hanger [not pictured]
- 6 = Original Tray Type G [not pictured]
- 7 = Rear Stacker Type 7140 (single-station multi-stacker), or
- 8 = Rear Stacker Type 7140 (dual-station multi-stacker) [not pictured], or
- 9 = RFG (third-party) inline folding system [not pictured]

## Functional Configuration

The network ready MFPs feature Ricoh's latest embedded next generation (GWNX) controller, are print, copy and scan enabled, and equipped with a 320GB HDD/document server. Functional upgrades include a wireless LAN interface, web browser, OCR unit, SD card for NetWare printing and a DWG option for printing from AutoCAD.

More peripheral and functional upgrade options are listed below (see EDP Codes and Dependencies)

## 7. Target Markets

MP W7100SP and MP W8140SP are designed to meet demanding mid- to high-volume imaging requirements in the technical market. Target customer groups will include architectural firms, engineering companies, construction and manufacturing businesses. MP W7100SP and MP W8140SP can be deployed as shared workgroup devices and will be used by designers to print accurately scaled CAD drawings and to scan and share annotated or hand drawn originals.

MP W7100SP and MP W8140SP are also well suited for applications in centralised print environments, such as CRDs and Pay-for-Print bureaus. The embedded print controller provides support for multiple file formats, the USB/SD card reader simplifies walk-in use and, with the MFPs able to switch quickly between media sources, MP W7100SP and MP W8140SP will enable a wide variety of wide format documents to be printed profitably and with minimal fuss.

Business drivers will include:

Sector	Business Drivers	MP W7100SP/W8140SP Advantages
Technical Office	Reduce time to market	Affordable technology can replace centralised/outsourced solution, improving control and accelerating design process.
Technical Office	Digitise paper-based archives	The colour scanner, scan-to functionality and integral document server allow hard copy originals to be archived.
Technical Office and CRD/PFP	Improve productivity	Fast throughput, multi-roll feed system and intuitive operation will support more productive work practices.
Technical Office and CRD/PFP	Capture and share amendments	Ricoh's simple scan-to-email feature allows critical amendments to be captured, distributed and actioned more quickly.
Technical Office and CRD/PFP	Release floor space	The single-console MFPs require minimal space, can be shared by workgroup users and will replace multiple stand-alone devices.
CRD/PFP	Expand customer services	Compact, affordable and easy-to-use, the MFPs can be used to provide profitable wide format printing and scanning services.
CRD/PFP	Simplify service delivery	USB/SD card reader simplifies walk-up use, multiple file formats are supported and the MFPs switch quickly between media sources.

## 8. Key Features

Mainframe		
Feature	Advantage	Benefit
Single-console	The scanner, print engine and paper feed are integrated in a single console, eliminating the need for separate stand-alone units.	Releases office space.
Compact dimensions 	With a footprint of just 1,250mm by 755mm, the new MFPs take up less than 1m <sup>2</sup> of floor space.	Reduces spatial requirements.

Scanning		
Feature	Advantage	Benefit
Colour scanning station	Scan, save and distribute large format originals in full colour.	Digitise paper-based archives, saving space and making information easier to find.
Scanner separation unit (option for MP W8140SP) 	Allows the scanning unit to be mounted separately from the print engine.	Improves access by physically separating scanning and printing processes.

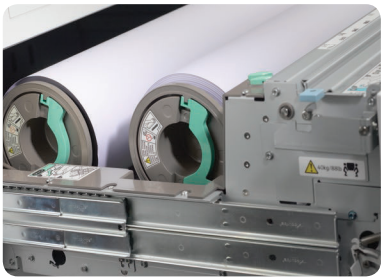

Operation		
Feature	Advantage	Benefit
Colour touchscreen operation panel	MP W7100SP and MP W8140SP share the same 9" touchscreen operation panel as their small format counterparts.	Simplifies operation and improves productivity. Users of Ricoh small format MFPs will be instantly familiar the intuitive operating system.
Animated guidance	The colour touchscreen panel provided animated guidance in the event of a paper jam.	Simplifies jam clearance, reducing downtime.

Printing		
Feature	Advantage	Benefit
GWNX controller	The new wide format MFPs have an embedded controller that provides print, scan, copy and document server functionality.	Streamlines document processes, saves space (embedded controller) and reduces capital expenditure (controller included in mainframe price).
RP-GL/2, RTIFF and PDF drivers	RP-GL/2, RTIFF and PDF drivers support HP-GL/GL2, HP-RTL, TIFF, JPEG and PDF format.	Easily print standard raster, vector graphics and postscript files.
DWG print option 	DWG print option extends support to DWG, DXF and DWF format.	Print native AutoCAD files.

Document Server		
Feature	Advantage	Benefit
Document Server	A 320 GB hard disk drive provides document server functionality. Documents saved to the document server can be printed on demand or shared via a URL.	Printing on demand and sharing documents electronically reduces waste and cuts print expenditure.
Document preview	Scanned documents can be previewed on the operation panel before they forwarded to another user.	Reduces errors and ensures information is shared effectively.
USB/SD card reader 	The USB/SD card reader enables wide format documents to be printed from and scanned to USB/SD card media.	Improves accessibility as wide format documents can be printed from or saved to portable electronic media.

Security		
Feature	Advantage	Benefit
Encryption	To protect document security, scanned documents can be encrypted and password protected.	Protects document security.
Data Overwrite Security (option)	Data written temporarily to the hard drive can be overwritten up to nine times, protecting data should the hard drive be stolen.	Protects data security.

Job Management		
Feature	Advantage	Benefit
Job management (via operation panel and WebImageMonitor)	Administrative tasks, such as changing the print queue and deleting jobs can be conducted via the operation panel or using Web Image Monitor.	Simplifies job management.
Force print	Paper size optimisation (auto image rotation and best fit roll selection) ensures that production doesn't stop in the event of a paper size mismatch.	Enables productive non-stop operation during high volume printing.

Paper Handling		
Feature	Advantage	Benefit
Two-roll paper station 	MP W7100SP and MP W8140SP can hold two different media formats on line. With A0 media (840mm wide) and A2 media (420mm wide) pre-loaded, the MFPs can produce A0, A1, A2 and A3 documents without waste and without need to stop production and change media.	Eliminates waste and saves time, improving productivity.
Single sheet bypass	The bypass feed has flat paper path and supports media of 51-134 gsm.	Print and copy onto pre-cut thick media, such as display card.
Optional 3rd / 4th roll feed	With the optional 3rd / 4th roll feed attached, MP W7100SP and MP W8140SP can hold four media rolls online ready for use.	Improves productivity.
Optional 2 x 250 sheet cassette	Automatically feeds pre-cut media of A2, A3 or A4 size.	Proof documents without wasting paper and reduce large format plans in a single step to more manageable smaller formats.
Optional single-station multi-stacker	Attaches to the front or the back of the machine to receive copy sets.	Simplifies document handling as copy sets are delivered flat.
Optional dual-station multi-stacker	Attaches to the back of the machine to receive sets of originals and copies.	Simplifies document handling and protects originals as original documents and copy sets are delivered flat.
Optional RFG online folding system	Online finishing system which fan and cross folds documents ready for distribution.	Reduces manual labour, improving and reducing production costs.

## 9. Specifications

Technology		
Configuration		Console
Copying/Printing Process		Electro-photographic printing
Photo-conductor		OPC drum 970mm x 80mm
Drum yield		30K meter (98.4K ft)
Charge system		Scorotron (corona charge)
Imaging lens		SELFOC lens
Development system		Magnetic brushDual component dry toner system
Fusing	Method	Heat and pressure

		2012server/2012serverR2
		Mac OS (later than Mac OS10.7)
Supported Languages		English, Brazilian Portuguese, Danish, Dutch, Finnish, French, German, Italian, Japanese, Korean, Norwegian, Polish, Romanian, Russian, Simplified Chinese, Spanish, Swedish, Traditional Chinese, Turkish

Scanner Specifications		
Optical Resolution:		Scan to email/folder: 150 / 200* / 300 / 400 / 600 dpi, *Default Twain: 150-1,200dpi
Scan Mode		Mono : Drawing mode (Default), Text mode, Text/Photo mode, Text/Drawing mode, Photo mode, Gray scale
		Color : Text/Photo mode, Photo,
Scan Speed		42.5- 340mm/s (600dpi)
Scan detection		Auto Detect, Preset Paper size, Custom size
Network Interface:		Standard: Ethernet 10/100BaseTX
		Option: Wireless LAN (802.11a/b/g/n)
Protocol		Network: TCP/IP
		Sending E-mail: SMTP AUTH, POP before SMTP
		Scan to Folder: SMB, FTP, NCP
Image Density		Lighter to Darker: 9 Levels
Edit		Erase boarder, Positive/Negative, Mirror Image
Bundled Scanner driver		Network Twain Driver

Scan to E-mail		
Compression Method	1 bit	MH,MR,MMR(default) It can be changed in SP mode
	JPEG	YES (Compression default)
	High Compression	No

Requirement		SMTP (Mail Server) Gateway and TCP/IP
Authorization function		SMTP authentication POP before SMTP authentication
Resolution:		150dpi, 200dpi (Default), 300dpi, 400dpi, 600dpi
MAX E-mail address#		2000 addresses
Register Group address:		Max: 100 groups
Maintain E-mail address:		Direct input on operation panel, "Web Image Monitor", and "Smart Device Monitor for Admin" are available.
Address Search	Mainframe Address Book	E-mail address search available Folder address search available
	LDAP	E-mail Address search available
Number of Destination		500
Attention		To, cc, bcc
Body Message	Manual Input	Yes
	Pre-register by user	No
	Preset	Message: "This e-mail included attached file sent from xxxx (machine model name)."
E-mail Size (with restriction):		128 -102,400KB, Default = 2,048KB
File type		Multi Page TIFF (Default), Multi Page PDF, Single Page TIFF
		Single Page PDF, Single Page JPEG, High compression PDF, PDF/A
PDF Security Setting		Yes
Program User Setting:		Yes
Divide and send e-mail:		Yes

\*1: If the sent file size exceeded the maximum E-mail size, it would be divided to multiple sending. In addition, the sent files might not be accepted by the receiving side due to the limitation in the receiving capacity at the receiver SMTP server or E-mail software setting.

Scan to Folder	
Protocol Support	SMB (Server Message Block), FTP (File Transfer Protocol), NCP
Security	Client folder log-in (log-in name and password)Encryption of log-in name and password during transmission
Resolution	150dpi, 200dpi (Default), 300dpi, 400dpi, 600dpi
Register client folder address	Max. 2000 folders
Maintain client folder address	Direct input on operation panel, Web Image Monitor, Smart Device Monitor for Admin
Destination client folder address input via operation panel:	Yes SMB: Network path -> Client folder -> Password FTB: Server -> Network path -> User account -> Password
Search client folder	SMB: Browsing directly to the designated folders
	FTP: By client folder name
Max. client folder numbers per send	Max. 50 client folders / PCs per send
Destination Combination	Yes
Group address	Max. 100 destinations (To Folder: 50, To E-mail: 100) (*1)e.g. 100 destinations 50 folders included >>>OK
	100 destinations 51 folders included>>>Failure
Input Subject	No
Scan File Size:	Up to 2000MB
File Size when combined Scan to Folder & Scan to E-mail:	128 - 45,389KB, Default = 2,048KB (With restriction)
	(Scan to E-mail file size applied).

File type	Multi Page TIFF (Default), Multi Page PDF, Single Page TIFF, Single Page PDF, Single Page JPEG, High compression PDF, PDF/A
PDF Security Setting	Yes
Program User Setting	Yes
Resend	Yes

(\*1) User can send to Max. 100 destinations in the same group. But the number of folders has to be less than 50, since Max. folders destinations are 50. If there are more than 50 folder destinations registered in the Group address, a message pops up.

Network TWAIN Driver	
Resolution	150 - 1200dpi by 1dpi step
Scan size	Please see mainframe spec
Memory	Minimum required memory for OS + 8MB
CPU	Pentium 150MHz or more, or minimum required CPU for OS
HDD	More than 100MB of disk space is required.
Network	Protocol: TCP/IP, UDP/IP, ICMP/IP

## 10. Service and Supplies

MP W7100SP and MP W8140SP should be sold with a full service agreement. A Ricoh full service agreement covers all parts and labour, and maintenance is carried out by trained service technicians. By offering a full service agreement, we can differentiate ourselves from competitors offering 'care pack' extended warranties that do not cover all components and which are often fulfilled by third party maintenance providers.

A meter records each decimetre (1/10th of a meter) printed by the wide format MFP. The meter allows for prints and copies to be billed as consumed. According to local market conditions toner may either be included as part of a metered service agreement or charged for separately as a consumable item. Sales people should refer to service or sales management for service pricing and to confirm whether toner is included within the service contract.

Metered billing offers the following customer advantages:

- Full service provision
- Dedicated national/international service operation
- Remote monitoring and diagnostics (@Remote)
- Telephone and field support
- Low pre-agreed page cost
- Transparent all-inclusive price

The new machines are extremely reliable. MP W7100SP has a maximum recommended print volume of 6,500 metres a month (10,940 A1 prints) and is targeted at customers with an average print volume of 1,200 metres a month (2,020 A1 copies).

MP W8140SP has a maximum recommended print volume of 16,660 metres a month (28,040 A1 prints) and is targeted at customers with an average print volume of 2,500 metres a month (4,210 A1 copies).

MP W7100SP and MP W8140SP support @Remote. Using @Remote, the wide format MFPs can be monitored in real-time, with the Ricoh service operation able to identify issues before they become apparent to users and deliver consumable items such as toner in advance of need.

Service and supply specifications are provided below:

Service and Supply Specifications			
Model		MP W7100SP	MP W8140SP
Toner yield		6,000 copies @ A1/D, Ricoh 6% chart /cartridge (800g)	
Developer yield		138,000 copies @A1/D LEF, Ricoh 6% chart / 1.0kg x 2bags (2.0kg)	
Photoconductor yield		30,000 linear metres	
Print Volume	APV	1,200 linear metres or 2,020 A1 prints	2,500 linear metres or 4,210 A1 prints
	MPV	6,500 linear metres or 10,940 A1 prints	16,660 linear metres or 28,040 A1 prints
Maintenance	PM cycle	10,000 linear metres or 16,840 A1 prints	
	MCBC	3,400 linear metres or 5,730 A1 prints	
Machine life		1,683,000 A1 prints or 5 years, whichever comes first	

# 11. Competition

## Five Star Advantages

We have compared the specifications of the new products against the specifications of their closest competitors, identifying five star advantages against each.

Data was obtained from the web and from brochures. Whilst care was taken to ensure that information is accurate, no liability will be accepted for errors and omissions.

Rear Stacker (single-station stacker)	Additional inkjet driver for KIP Color
Rear Stacker (dual-station stacker)	Color Advanced copy and print to inkjet
RFG (third-party) folder	PostScript and PDF printing
Browser Unit	
OCR Unit	
NetWare Printing	
TotalFlow PrintCopyTool	
PrintCopyTool Option Type D2015	
DWG Printing	
Wireless Interface	
DataOverWrite security	

Model	Ricoh MP W7100SP	Oce PlotWave 750	Advantages
<b>Physical</b>			
Type	Single console MFP	Two-station printer/scanner	Single console design with integrated scanner/copier ★
System Memory	2.5GB RAM, 320GB HD	2 GB RAM, 1TB HD	Latest technology including GWNX controller
Introduced	2015	2013	
Weight	230 kg	290 kg	Compact design saves valuable space ★
Dimensions (HxWxD)	1,200 mm x 1,250 mm x 755 mm	1475 mm x 1440 mm x 800 mm	
<b>Functionality</b>			
Printer	Std	Std	
Copier	Std	Opt	Copying functionality included in mainframe price ★★
Scanner	Std (colour)	Opt (colour)	Scanning functionality included in mainframe price ★★
Document Server	Std	Std	
User Interface	Colour touchscreen	Touch screen	Colour touchscreen simplifies operation
<b>Productivity</b>			
Warm-up Time	2 min	Info not avail	
First Copy (A1)	10 sec	Info not avail	
Multicopy (A1)	10 ppm	9 ppm	11% faster/more productive ★
<b>Paper Supply</b>			
Paper Capacity (std/max)	2 / 4 rolls	2 / 6 rolls	
Paper Weights	52 to 110 gsm	75 to 100 gsm	Handles heavier weight media
Bypass Capacity	1 sheet	1 sheet	
Max Output Size	915mm x 15m	914 mm x 20m	
<b>Printing</b>			
Network Interface	Gigabit Ethernet (std)	Std Ethernet	High bandwidth interface for faster communication
USB Interface	Std 2.0, opt 1.1 (host)	None	Scan to and print from USB/SD card media
PDL	RP-GL/2, RTIFF, PS3 (std) / DWG (opt)	Opt Adobe PS3	PostScript printing included as standard
Resolution	600 x 600 dpi	600 x 1200 dpi	
<b>Scanning</b>			
Scanning Speed	42.5 - 340 mm / second	4 - 9.7 m / min	
Connection Type	Network	Network	
TWAIN Compatible	Yes	Info not avail	Initiate scanning using scanning software on PC/Mac
LDAP Support	Yes	Info not avail	Uploads email addresses from LDAP server
<b>Scan Destinations</b>			
E-mail	Yes	No	Share hardcopy document more easily
FTP	Yes	Yes	
SMB	Yes	Yes	
HDD	Yes	INA	
URL	Yes	No	Remote web access to stored documents
<b>Security</b>			
Network User Authentication	Yes	Info not avail	
HDD Overwrite	Opt	Std	
HDD Encryption	Std	Info not avail	Encrypts and protects files saved to hard drive
Secure Print	Std	Info not avail	
<b>Copying</b>			
Zoom Range	25 to 400 (0.1%)	25 to 400 (0.1%)	
Image Rotate	Std	No	
Neg/Pos	Yes	No	Reverse blueprints to make them more legible
Stamping	Std	No	Clearly identify copies using an automatic stamp

#### Options
