IMPROVING ON PERFECTION IS EASIER THAN IT SOUNDS.

The new and improved DocuMate® 152i may look like its award-winning predecessor, but this small scanner has been overhauled with new features. A complete small-office document management solution, the DocuMate 152i is 40% faster and includes robust PC and Mac TWAIN drivers and software.

The DocuMate 152i, color document scanner, now scans up to 50 images per minute (ipm) in duplex mode, includes a 50-page automatic document feeder and has the ability to automatically scan documents into searchable PDF files. The scanner also offers a more powerful suite of bundled software designed to help you organize and find the information important to you.

DESIGNED TO DO MORE

It's easy to say that "you want to do more with the paper on your desk." The hard part is finding the right tool to help you achieve

that goal. Well-known for quick and easy scanning setup and operation, the DocuMate 152i is designed for small businesses, home offices and students who are looking for an easy-to-use scanner that includes all the tools needed to declutter their paper filled lives.

Powered by Visioneer OneTouch® technology, the scanner allows users to scan to the "destination" of their choice by pressing a single button, eliminating multiple steps usually required to save scanned documents in popular file formats. Visioneer OneTouch allows you to scan documents to your choice of 9 preset yet completely user configurable destinations. This enables your documents to be scanned with the correct settings for resolution, color, cropping, file format and then delivered to virtually any application, folder or device – all at the touch of a button.

The DocuMate 152i produces clear and sharp scans of any document, in color or black and white. Worried that your highlighted notes from the meeting won't

scan clearly? What about the receipt that was folded in your pocket? Real world documents are never a problem for the DocuMate 152i. Visioneer Acuity technology enables the scanner to instantly improve the visual clarity of every scanned image. You get perfect scans from imperfect originals.
